The Group has been separately disclosing the financial indicators for the non-banking operations since 1Q2023 to provide a clearer picture of how the Group's core platform business has performed.

The Group's non-banking operations continued to show strong growth in 3Q2023 and 9M2023. Even though the banking operation (iFAST Global Bank) is still in the initial build-up stage, the Group is seeing encouraging progress. Net revenues from the banking operations grew 49.4% YoY to S\$3.32 million during the quarter, driven largely by the new divisions of Digital Transaction Banking and the Digital Personal Banking. Deposits and balances of customers grew 140.4% to S\$232.09 million as at 30 September 2023 from S\$96.55 million at the end of 2022.

Going forward, the Group expects overall revenue and profitability to show marked improvements. The Group expects profitability in 2023 to be substantially better than in 2022, while the revenues and profitability in 2024 are expected to show robust growth compared to 2023.

The expected improvements will come about as the Group makes good progress on its 3-year Plan announced since earlier in the year. The Group's wealth management platforms are expected to continue to progress, while the ePension division will contribute more substantially going forward.

Profit contributions from iFAST Global Bank are expected to still be negative in the next three quarters. However, the Group expects iFAST Global Bank to play a major role in the growth of the Group in the medium to long term, particularly beyond 2025.

Following the launch of Digital Personal Banking (DPB) platform on iFAST Global Bank in late April, the division has continued to actively market the product to retail customers. In line with the banks' vision to enable consumers from around the world to open a UK digital bank account conveniently online without having to be physically present in UK, iGB has received bank account opening applications from over 50 different countries on its DPB platform.
