iFAST Corporation

FOR IMMEDIATE RELEASE

iFAST's Inaugural Suite of ETFs Commences Trading on SGX

SINGAPORE (22 October 2026) — iFAST Corporation Ltd. ("iFAST Corp" and together with its subsidiaries, the "Group"), today marked the listing of the first four iFAST Xtrackers exchange-traded funds ("ETFs") on the Singapore Exchange ("SGX"). The ETFs are issued through iFAST Global ETFs Select Series VCC and managed by iFAST Financial Pte. Ltd., in partnership with DWS Group ("DWS"), the asset management arm of Deutsche Bank, which operates its ETF business under the Xtrackers brand.

The ETFs commence trading from 22 October 2026, marking a new milestone in the Group's evolution as a global digital wealth management platform. The inaugural ETF suite combines exposure to the global Artificial Intelligence and Big Data theme with three major Asian equity markets, Japan, South Korea and Taiwan. The launch expands iFAST's role in the investment value chain, complementing its established wealth management and investment distribution businesses.

The four ETFs listed on the SGX-ST are:

- **iFAST Xtrackers Artificial Intelligence & Big Data UCITS Index ETF** (SGX: XBG)
- **iFAST Xtrackers Nikkei 225 UCITS Index ETF** (SGX: JPY)
- **iFAST Xtrackers MSCI Korea UCITS Index ETF** (SGX: KOR)
- **iFAST Xtrackers MSCI Taiwan UCITS Index ETF** (SGX: TWD)

Think AI. Think Broader.

The inaugural ETF suite reflects two complementary investment perspectives: participation in the global AI and Big Data investment theme, and broader access to major Asian equity markets. Together, the four ETFs provide investors with additional ways to diversify their investment exposure through securities listed and traded in Singapore.

Listing the ETFs on SGX-ST brings selected global investment exposures closer to Singapore investors through local market access. Investors can trade in Singapore dollars and during local market hours, while eligible investors may also use Supplementary Retirement Scheme ("SRS") funds. For Singapore-based investors, locally traded UCITS ETFs may also offer different tax and estate-planning advantages compared with holding certain overseas-listed securities directly, depending on the fund structure and individual circumstances.

For iFAST, this milestone represents more than the introduction of four new investment products. The Group's entry into ETF issuance is a natural extension of its capabilities as a global wealth management platform, complementing the broad range of investment products available across its B2C and B2B platforms. Through this new venture, the Group aims to develop selected ETF solutions that provide investors with access to markets and investment themes relevant to long-term wealth management.

Mr Lim Chung Chun, Group CEO of iFAST Corp, said: "We are pleased to celebrate this important milestone alongside SGX, DWS Group and our business partners. The listing of our inaugural suite of ETFs represents a new chapter for iFAST as we expand into ETF issuance, building on our experience and understanding of investor needs to bring relevant global investment opportunities closer to investors through SGX. We look forward to strengthening our partnerships and broadening the range of investment choices available to investors as the Singapore market continues to develop."

iFAST has partnered with DWS, the asset management arm of Deutsche Bank, which operates its ETF business under the Xtrackers brand. Xtrackers offers more than 300 ETFs across asset classes and markets. The partnership combines iFAST's local market knowledge, investor reach and wealth management ecosystem with Xtrackers' global ETF expertise. The ETFs are structured under the Undertakings for Collective Investment in Transferable Securities ("UCITS") framework, a widely used European regulatory framework that sets standards in areas including diversification, liquidity and investor protection.

Sophia Kim, Head of Xtrackers Sales APAC at DWS, said: "We are delighted to celebrate the listing of iFAST's inaugural ETFs on SGX, marking an important milestone in our collaboration. These listings bring investment opportunities across the AI megatrend and the Japan, Korea, and Taiwan markets closer to investors in Singapore. By bringing together Xtrackers' broad product range and more than two decades of index investing experience with iFAST's local market knowledge and established wealth management ecosystem, we look forward to building on this partnership and continuing to broaden investment choice for investors in Singapore."

Ng Yao Loong, Head of Global Financial Markets, SGX Group, said: "iFAST's debut as a home-grown ETF issuer brings new capability and ambition to Singapore's ETF ecosystem. Its partnership with Xtrackers gives investors a convenient SGD-traded channel to three important North Asian markets and the global AI and Big Data theme on SGX. It is a strong example of how familiar brand names, trusted distribution and global investment expertise can come together to broaden investor choice and accelerate the growth of our ETF market."

Francois Verlaine, Managing Director and Regional Head of Securities Services for ASEAN and South Asia, Standard Chartered, said: "The launch of these ETFs is another important milestone in our longstanding partnership with iFAST. As authorised custodian and ETF registrar, Standard Chartered is pleased to provide the infrastructure and expertise that enables iFAST to bring new investment solutions to market. We are proud to support their continued growth and, more broadly, the development of Singapore as a leading funds and wealth management hub."
